

## Why MCN

MCN Solutions is a unique synthesis of IT professionals from various domains, having strong management, engineering experience, and varied technical skills-set. The high-profile team is committed to deliver the quality to customers by providing on-time and accurate solutions.

Having offices in USA and India also help access our services instantly and efficiently. Our key to success is the unique approach of the training and software development process.

### Trusted

MCN brings over 15 years of proven experience in Project Management and Software Development outsourcing and consulting services. Most of our clients have been with us since the day 1 and have never looked back. We do not charge you unless you are fully satisfied.

### Reliable

Just tell MCN what you need, sit back and relax. Give MCN one month trial and see how smooth your software development can be.

### Flexible

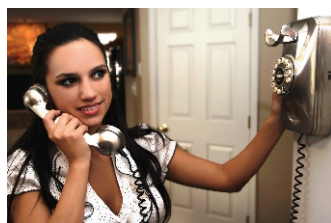

By having offices in the United States, UK, and India allows us to form a blend team of personnel on client-side who can effectively communicate with the clients and gather requirements and get the work done at our back office in India. By having a blend team reduces the client development and deployment costs.

### MCN provides flexible model of the following:

- Outsource the entire project on time and material or fixed cost
- Hire a team of developers and test engineers and you manage the team
- Hire developers and test engineers on monthly and even weekly basis

## About Us

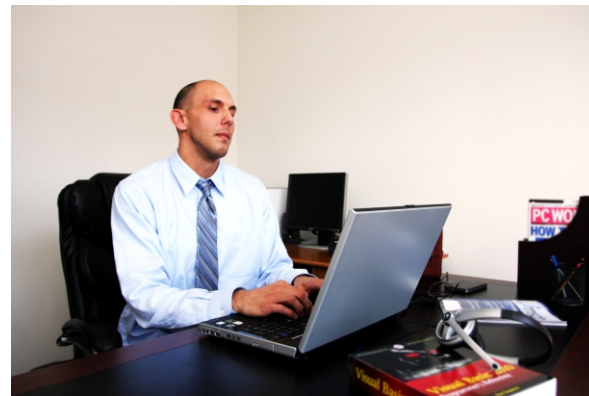

MCN Solutions is a fast growing IT company focused on delivering the best and most cost-effective solutions for Software Development, Software Testing, IT Consulting, IT Training and Publishing. The origin of the company is deeply rooted in the software development technology. The strategy built into the corporate structure of MCN Solutions indicates a new way of thinking about applications and system software.

## Software Development

We provide outsourced software development services for in-house applications, across the project lifecycle. We partner with our clients from internal proposals and budgeting, through project approvals, all the way to delivery, training, maintenance and support.

MCN Solutions has its offices in USA & India. Our flexible offshore software development model allows companies to maximize their ROI, while maintaining complete control over projects because of our cross geo presence. We also allow our clients to leverage flexible team size and cost-efficiency through our distributed development without increased risks.

One of our strengths is that we work on 'Continuous Technical Learning' of our employees. For this we have partnered with our MCN Professionals which is also a sister concern of MCN Solutions. The bench strength of MCN is trained in a range of technologies and is competent enough to not only deliver quality product on time but also suggest the most effective technology to be used for project development.

### Our Customized solutions are available for:

- Internet Applications
- Client - Server Applications
- Migration of Existing Applications
- Integrating Business and Enterprise Applications

### MCN has proven expertise in providing solutions across industry segments like:

- Insurance, Banking and Financial Services
- Transport and Travel
- Retail
- Telecom
- Manufacturing and Automotive

## Services Offered

- Web Applications
- Windows Client Applications
- Enterprise Development
- Mobile Development
- DBA and Data Warehousing
- Software Testing
- Business Intelligence
- Components Development
- Software Consulting
- Training
- Project Management

## Consulting

MCN Solutions consultants are experienced professionals who integrate technology foundation with an in-depth understanding of business processes. We provide the services to support full life cycle of software development such as Requirement Gathering, Planning, Feasibility Analysis, Overview and Detailed Design, Development, Process Integration, System Testing, Bug Fixing and Re-engineering.

### Our key areas of consulting are:

- Technical Personnel and Staffing
- Software Design, Planning, and Development
- High Level Project Consulting
- In-house and On-site Consulting

## Publishing

MCN Solutions provides the optimized publishing solutions, which helps you to design, develop powerful web and print media presence in terms of cost, quality and time. We are specialized in pre-press as well as post-production of publishing.

We have been catering to the needs of various clients with diverse solutions for requirements like HTML, SGML, XML, QuarkXpress, PageMaker, CorelDraw, PDF's, MS-Word, text files and other file formats.

### Our state-of-art services & solutions include:

e-Books, Data Conversion, Designing, Proof Reading, Data Processing, Document Scanning

## Software Testing

Clients expect IT organizations to deliver higher quality systems in lesser time, and with fewer resources. Software testing is often the first systems-development budget item to be cut when corporate spending is trimmed. Large organizations are finding it increasingly difficult to do comprehensive software testing internally.

MCN offers comprehensive testing solutions ranging from performance to interoperability testing. These solutions help organizations achieve predictable software quality gains while reducing the time and cost associated with testing activities by leveraging MCN's Global Delivery Model.

Our Software Testing techniques build the customized applications and provide the consistent quality assurance.

### Our Testing Services:

- Functional and Regression Testing
- System Testing
  - Load/Stress Testing
  - Volume Testing
  - Compatibility Testing
- Full Life Cycle Testing

### MCN Solutions Offers:

- Proven tools and methodologies
- Proficiency in building and using programmed testing tools
- Competence to handle unpredictable industry requirements
- Flexible engagement models - Off-shore & On-site teams
